

## OUTFITTER/GUIDE RIVER BOATING APPLICATION TRAINING REQUIREMENTS (FOR OG-11)

*See Rules for complete requirements.*

### Unclassified river section qualifications:

To qualify as a **float boat** guide on **unclassified** rivers and streams, the applicant shall have had one (1) complete trip on each of the rivers applied for under the supervision of a float boat guide licensed for each of those rivers. A completed OG-11 Training Log shall be submitted giving dates, river section, and the signatures of the supervisor, trainee, and licensed outfitter.

### Classified river section qualifications:

A **float boat** guide on a classified river shall be licensed as a **boatman** or a **lead boatman** according to his experience on that specific river.

Each float boat trip on a classified river shall have a lead boat operated by a guide licensed as a lead boatman for that specific river and all other boats participating in that trip shall follow the lead boat and shall be operated by a guide licensed as a boatman or a lead boatman for that specific river. (See Rule 040.01)

Each training trip means the total section of river as designated by the Board. (See Rules 040, 041, 042 and 059)

An applicant for a **float boatman** license on **classified** rivers may qualify in one of three ways:

- a. The guide shall have had three (3) complete float boat trips on each of the classified rivers applied for, under the direct supervision of a float boatman licensed for that river or they shall have had one or more complete float boat trips on each of the classified rivers applied for under the direct supervision of a float boatman licensed for that river with the remaining trip(s) in a boat with no more than one other trainee following a licensed float boatman for that river but they must not have passengers in the boat; or,
- b. The guide shall have logged at least 500 miles as a commercial float boat guide on any rivers applicable to Rule 040.01.a, and shall have one (1) complete boat trip on each river applied for under the direct supervision of a float boatman licensed for that river, or in a boat with no more than one other trainee, following a float boatman licensed for that river, but there must not be any passengers in the boat. There is a OG-18 "500 Mile Log of Commercial Float Experience" form available; or,
- c. If the guide is licensed as a lead float boatman on a classified Idaho river, they may qualify for a float boatman license on other classified rivers after one (1) complete float boat trip on each river applied for under the direct supervision of a float boatman licensed for that river or in a boat with no more than one other trainee, following a float boatman licensed for that river, but they must not have passengers in the boat.

An applicant for a **lead boatman** license must have had six (6) complete float trips. One (1) trip must have been within the sixty (60) months preceding the date of the application on each of the classified rivers applied for. Any float boatman wishing to qualify for a lead float boatman license shall maintain and submit to the outfitter a completed OG-11 Training Log for each commercial float trip made, with dates, river section, and the signatures of the supervisor, trainee, and licensed outfitter.

### Powerboat qualifications:

- a. **Classified rivers**, an applicant shall have spent fifty (50) power boating hours on the total length of the river or section of river as designated by the Board, under the direct supervision of a power boat guide licensed for that river. The fifty (50) hours required must be distributed as evenly as possible along the total length of the river or section of the river for which qualification is sought.
- b. **Unclassified rivers** and streams, an applicant shall have spent at least ten (10) power boating hours on the total length of the river or section of river as designated by the Board under the direct supervision of a power boat guide licensed for that river or stream. The ten (10) hours required must be distributed as evenly as possible along the total length of the river or section of river for which qualification is sought.
- c. **Lakes and Reservoirs**, an applicant shall have spent at least ten (10) power boating hours on the lake or reservoir on which he wishes to operate, under the direct supervision of a powerboat guide licensed for that lake or reservoir. The ten (10) hours shall be distributed as evenly as possible on the entire area of the lake or reservoir for which qualification is sought.

If prior to the license application, the guide has been trained on the river, an OG-11-Training Log may be completed and submitted to the outfitter showing the dates, river section of trips, hours logged (if applicable), and the signatures of the supervisor, trainee, and licensed outfitter. This is done after the training is complete.

OG-11-Training Logs may be submitted at any time to the outfitter during a guide's tenure to amend the guide license. There is a \$20.00 fee for each amendment.

OG-11's may be found on IOGLB's website at [www.ioglb.idaho.gov](http://www.ioglb.idaho.gov) or by contacting (208) 327-7380.

**NOTE:** A license must be in possession of the licensee while engaged in outfitting or guiding and must be produced upon the request of an authorized person. Failure to do so shall constitute a violation of the Act or Rules.

Power	Float	Lead Boatman		<b>CLASSIFIED RIVERS</b>
